

Update History

◆U-WAVEPAK-BW_v1.0.5 (released August 2024)

• Changes

1. Added support for Windows 11 in the system requirements.
2. Increased the number of supported languages to 20.

List of Supported Languages:

Japanese/English/Italian/Dutch/Swedish/Czech/German/

Turkish/Hungarian/French/Polish/Spanish/Korean/Chinese (Simplified and Traditional)/

Indonesian/Thai/Vietnamese/Portuguese/Malay

*The language will automatically switch based on your OS language

◆U-WAVEPAK-BW_v1.0.3 (released August 2020)

• Changes

Fixed a bug that prevented the driver from being installed at the same time the installer installed the software. *No changes to Software

◆U-WAVEPAK-BW_v1.0.2 (released July 2020)

• Changes

1. Since it was confirmed that numerical data via U WAVEPAK BW was not entered as numbers into the upper software in the PC using a keyboard such as Czech or French, the keyboard emulation part was corrected.
2. The check box of the data output I/F is corrected so that the last setting state is stored and the previous state is retained when the software is started.
